RE: Scope of CRN 0F02026.2C for IIoT Pressure Products

To Whom It May Concern,

A select number of pressure products approved under CRN 0F02026.2C have been integrated into the IIoT product line. These include the PGU23.100 and PGU26.100 models, which utilize pressure gauge models 23x.5x and 23x.3x and the PEU-20 and PEU-21 models, which incorporate TIS-2x models. Both PGU and PEU models are rated for a maximum pressure of 1000 bar. Any pressure exceeding 1000 bar is not covered under CRN 0F02026.2C.

Note that this is a model addition only and does not require a revision to the CRN. The technical specifications and performance characteristics of the models remain unchanged.
